Specification: Main technical parameters: (unit: mm)

	Item	Parameter
1	Period	35-150 S/PCS
2	Capacity	150-1000 PCS/DAY
3	Alarm	HMI, buzzer, red light
4	Sustainability	Work continuously for 24 hours
5	Operation Temperature	20°C~38°C
6	Operating humidity	(30~70) %RH
7	Power Supply	AC220V 50HZ
8	Dimensions	2500(L)*1200(W)*1800(H)
9	Power	3000W
10	Machine Weight	200KG

FEATURES:

1. It is used for the production of flat wire circular single coils. Coils of various shapes can be used interchangeably and have extremely good compatibility.

2. It is compatible with flat wires within 50 square meters
3. The touch screen and PLC control. The transmission power is driven by a servo motor.
4. Precision lead screws and the slide rail serves as the transmission component, and various mechanisms work in coordination to complete the entire winding action.
5. Automatic feeding. The caching function enables one person to monitor multiple machines.
6. The equipment is stable and reliable. Currently, almost all the major suppliers in China in the industry are using our company's equipment for production.
7. All key components are made of imported parts, which are highly durable and basically have no after-sales problems.
8. The equipment control system is independently developed and easy to operate. Ordinary technicians can learn to use it within two hours.
9. The equipment can be changed quickly. Mature molds can be changed within one hour.
10. The after-sales service is reliable. The teaching video will be sent to you after you get the machine and our engineer will be ready to service online 24 hours/day.

Packaging

Packaging Material: Carton/Wooden case with foam inside. 1. General package(Paper carton or plastic bag): For small equipped parts for Digital CNC Wire Coil Winding Machine, Package it with form and pack paper to guarantee unbroken during the transport. 2.Wooden case package: For larger scale Digital CNC Wire Coil Winding Machine ,we have special skilled carpenter, who would make the proper wooden case with exact thickness, density,length. The up arrow ↑marked on the outer wooden case. Buffer material would be put in the wooden case to prevent crack and shock.

FACTORY:

Founded in 1993, KIOXIA LIGHT RING EQUIPMENT GROUP CO.,LTD. has solidified its status as a well-known manufacturer specializing in high-performance winding machines, paired with supporting production equipment and professional technological services. A targeted and high-performance offering in its product lineup is the KXY-V90 Flat Wire Vertical Winding Machine—a specialized equipment engineered for flat wire winding scenarios, adopting a vertical structure to ensure stable operation, precise wire arrangement, and efficient processing of flat wire-based wound components, fully reflecting the company's pursuit of excellent performance in niche winding needs.

In addition to delivering core equipment like the KXY-V90 Flat Wire Vertical Winding Machine, KIOXIA LIGHT RING provides highly cost-effective comprehensive manufacturing solutions. These solutions cover the production requirements of various wound components, including transformers, chokes, and more, effectively addressing the
